

Interventional Cardiology and Radiology Accessories

Available from APC Cardiovascular Ltd

We offer a range of products for cardiology and radiology procedures. These include venous introducer sets and arterial access products.

We also offer temporary pacing leads for atrial and ventricular pacing, either with or without introducers, guidewires, vessel dilators and needles.

Introducer Kits with Haemostatic Valve

For use in interventional cardiology and electrophysiology procedures including angiography, stenting, atherectomy, temporary pacing, endomyocardial biopsies, transeptal catheterisations, electrophysiology studies and RF ablations.

Kit includes:

An introducer with haemostasis valve composed of a polypropylene dilator in an external sheath enriched with barium sulphate. The introducer is equipped with a sideport tube with three-way stopcock and luer lock fitting.

The guidewire is 0.038" diameter, 50cm long, double-ended with "J"-Tip (3mm radius) and straight tip, in stainless steel.

F47705VK	5F Introducer Kit
F47706VK	6F Introducer Kit
F47707VK	7F Introducer Kit
F47708VK	8F Introducer Kit

Also available with 18G introducer needle.

Peel Away Introducer Kits

Kit includes:

HPDE dilator with PTFE sheath, 0.038" guidewire, 18G needle, 7cm length and 10ml syringe.

Classic Sheath™ Introducer Kits

The convenience of a tear-away introducer combined with a haemostatic valve preventing back bleeding and greatly reducing the possibility of air embolism.

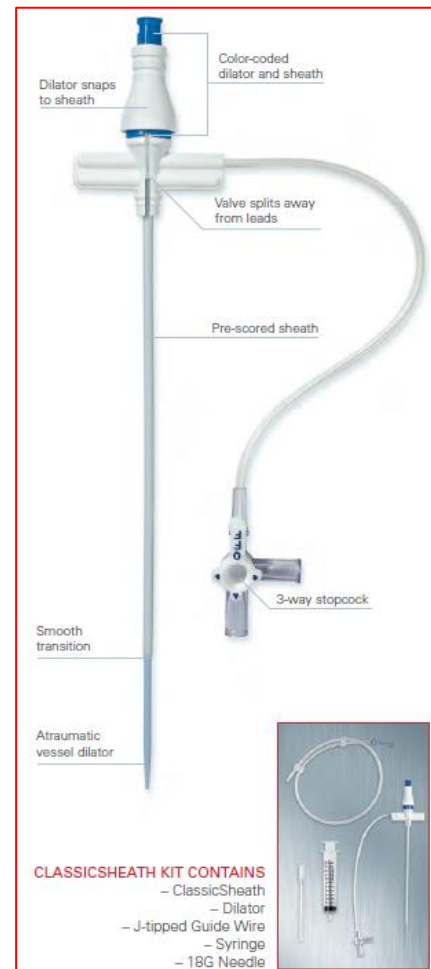

CLS-1005	5F Peel-Away Introducer with valve & sideport
CLS-1006	6F Peel-Away Introducer with valve & sideport
CLS-1007	7F Peel-Away Introducer with valve & sideport
CLS-1008	8F Peel-Away Introducer with valve & sideport
CLS-1009	9F Peel-Away Introducer with valve & sideport
CLS-1009.5	9.5F Peel-Away Introducer with valve & sideport
CLS-1010	10F Peel-Away Introducer with valve & sideport
CLS-1010.5	10F Peel-Away Introducer with valve & sideport
CLS-1011	11F Peel-Away Introducer with valve & sideport
CLS-1012	12F Peel-Away Introducer with valve & sideport

Kit includes:

13cm peel away sheath with haemostatic valve and sideport, 20cm dilator, 45cm "J"-Tip guidewire, 18G needle and syringe.

CLS-2507 7F peel-away introducer kit – longer length

This kit is the same as the CLS-10XX range, except the sheath is 25cm long and the dilator is 31.3cm long. Other sheath diameters are available on request.

Intradyn™ Procedure Sets

The Intradyn™ hemostasis introducers are designed to facilitate percutaneous introduction of catheters into the vascular system while minimizing blood loss.

05210950	Intradyn 6F Introducer Set
05210100	Intradyn 7F Introducer Set
05210097	Intradyn 8F Introducer Set
05210674	Intradyn 9F Introducer Set

All sets are supplied with a guidewire, scalpel, vessel dilator, gauze swabs, contamination shield, needle introducer with haemostatic valve and 3 way stopcock.
